RE: Architectural Services
Muslim School Buildings

Dear Mr. Baig:

It is a pleasure to submit to you this proposal to provide architectural services for the referenced project. It is my understanding that the scope of the project consists of the design of a raised wood deck system to connect 11 modular buildings for the school. We will design the decks, ramps, and handrails to conform to the current building code. We will also include engineering design for the exterior lighting and the electrical service to each unit. We will also design the dumpster enclosure to be permitted. Site work and landscape design and irrigation services would be performed by others under a separate contract. I have included a line item for coordination of a bidding process between general contractors, if necessary. I propose to perform contract administration, which would include site visits, preparation of revised drawings during construction, review of shop drawings, review of pay requests, on an hourly basis, at a hourly rate as stated on the attached rate sheet.

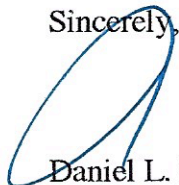

Our fee schedule would be as follows:

| | |
|------------------------------|------------|
| Initial Payment | \$ 2,000 |
| Completion of final drawings | 7,500 |
| <u>Approval of permit</u> | <u>500</u> |
| Total | \$10,000 |

Coordination of Bidding Process \$1,500
(between General Contractors, if necessary)

We are ready to start immediately, and look forward to a successful building program.

Sincerely,

Daniel L. Bumpus
